Viofor JPS System

From medicine to wellness

From medicine to wellness

Viofortherapy treats the body with **variable electromagnetic waves** generated by the Viofor JPS System, which cause changes in the organism similar to those caused by physical activity (physical strain, physical Activity); therefore they support biological regeneration.

As a result, a person's organism can regain its natural balance - 'homeostasis', which helps improve health and treat many ailments. The immune system gets stronger.

The system also has an analgesic, anti-stress and relaxing effect on the mind and body, without the side effects typically associated with pharmaceutical treatments.

A further documented advantage of the Viofor JPS System can be significant reduction of drug doses, e.g. painkillers, anti-inflammatory, sleeping pills, antidepressants - saving both the user and the healthcare system cash.

Viofor JPS System devices meet the requirements of EU directive 94/42/EEC on medical devices. Med&Life holds ISO 9001:2000 and ISO 13485:2003 certificates and CE 0120.

Effective treatment

Viofortherapy is an innovative system that uses electromagnetic energy **to stimulate health and ease the stresses of modern living**. Various types of therapy provided by the multiprogrammable computer driven Viofor JPS System **helps you regain your strength, fight stress and illness.**
